# 1. PRINCIPE DE NTP

Le client envoie une requête avec un horodatage (T1) et le serveur répond avec 3 horodatages que sont celui du client (T1), celui reçu par le serveur (T2) et la réponse d'horodatage envoyé par le serveur

## 2. PROBLEMATIQUE

Filter:  Expression... Clear Apply

No.	Time	Source	Destination	Protocol	Length	Info
17	3.209600	10.0.2.15	168.167.71.140	NTP	90	NTP Version 2, client
21	8.222457	10.0.2.15	168.167.71.140	NTP	90	NTP Version 2, client
25	28.341915	10.0.2.15	168.167.71.137	NTP	90	NTP Version 4, client
26	29.340204	10.0.2.15	91.189.94.4	NTP	90	NTP Version 4, client
27	29.412781	91.189.94.4	10.0.2.15	NTP	90	NTP Version 4, server
38	41.340084	10.0.2.15	168.167.253.19	NTP	90	NTP Version 4, client

Network Time Protocol

- Flags: 0x13
- Peer Clock Stratum: unspecified or invalid (0)
- Peer Polling Interval: invalid (0)
- Peer Clock Precision: 1,000000 sec
- Root Delay: 0,0000 sec
- Root Dispersion: 0,0000 sec
- Reference ID: NULL
- Reference Timestamp: Jan 1, 1970 00:00:00.000000000 UTC
- Origin Timestamp: Jan 1, 1970 00:00:00.000000000 UTC
- Receive Timestamp: Jan 1, 1970 00:00:00.000000000 UTC
- Transmit Timestamp: May 10, 2018 10:02:26.179324000 UTC

```
0030 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 .....
0040 00 00 00 00 00 00 00 00 00 00 00 00 00 00 .....
0050 00 00 de 9e 97 32 2d e8 30 00 ..2-.0.
```

```
try:
    s.settimeout(timeout)

    # create the request packet - mode 3 is client
    query_packet = NTPPacket(mode=3, version=version,
                              tx_timestamp=system_to_ntp_time(time.time()))
```

- A partir de la réponse du serveur, on peut connaître l'horodatage du client et ainsi le traquer.

## 3. SOLUTION PROPOSÉE

- Randomisation de l'horodatage à transmettre

### **RFC 5905**

#### **4.2. Transmit Timestamp Randomization**

While this memo calls for most fields in client packets to be set to zero, the transmit timestamp is randomized. This decision is motivated by security as well as privacy.

## 4. TRAVAIL EFFECTUÉ

- Python: <https://github.com/Tipoca/ntplib/>

```
root@NTP4AFRICA:~/ntplib# ls
CHANGELOG  COPYING.LESSER  nntplib.py.mu  ntplib.pyc  README.md  test_ntplib.p
COPYING    MANIFEST        ntplib.py      PKG-INFO    setup.py
```

## ntplib.py

```
import time
+import random

class NTPException(Exception):
@@ -270,10 +271,10 @@ class NTPClient:

    try:
        s.settimeout(timeout)
-
+        aleat = random.random()+ time.time()
        # create the request packet - mode 3 is client
        query_packet = NTPPacket(mode=3, version=version,
-                               tx_timestamp=system_to_ntp_time(time.time()))
+                               tx_timestamp=system_to_ntp_time(aleat))

        # send the request
        s.sendto(query_packet.to_data(), sockaddr)
diff --git a/test_ntplib.py b/test_ntplib.py
index 3e559af..5943d0c 100755
```

## 5. RÉSULTAT

```
root@NTP4AFRICA:~/ntplib# python test_ntplib.py
```

```
...
```

```
-----  
Ran 3 tests in 8.405s
```

```
OK
```

```
root@NTP4AFRICA:~/ntplib#
```

No.	Time	Source	Destination	Protocol	Length	Info
4095	34.192606	196.200.214.51	168.167.168.34	NTP	90	NTP Version 2, client
4096	34.192700	196.200.214.51	168.167.168.34	NTP	90	NTP Version 2, client
4097	34.192744	196.200.214.51	168.167.168.34	NTP	90	NTP Version 2, client

4099	34.192992	196.200.214.51	168.167.168.34	NTP	90	NTP Version 2, client
4100	34.193037	196.200.214.51	168.167.168.34	NTP	90	NTP Version 2, client
4101	34.193076	196.200.214.51	168.167.168.34	NTP	90	NTP Version 2, client
4102	34.193117	196.200.214.51	168.167.168.34	NTP	90	NTP Version 2, client
4137	34.447033	168.167.168.34	196.200.214.51	NTP	90	NTP Version 2, server
4138	34.447034	168.167.168.34	196.200.214.51	NTP	90	NTP Version 2, server
4139	34.447035	168.167.168.34	196.200.214.51	NTP	90	NTP Version 2, server

Network Time Protocol (NTP Version 2, client)

- Flags: 0x13, Leap Indicator: no warning, Version number: NTP Version 2, Mode: client
- Peer Clock Stratum: unspecified or invalid (0)
- Peer Polling Interval: invalid (0)
- Peer Clock Precision: 1.000000 sec
- Root Delay: 0 seconds
- Root Dispersion: 0 seconds
- Reference ID: NULL
- Reference Timestamp: Jan 1, 1970 00:00:00.000000000 UTC
- Origin Timestamp: Jan 1, 1970 00:00:00.000000000 UTC
- Receive Timestamp: Jan 1, 1970 00:00:00.000000000 UTC
- Transmit Timestamp: May 10, 2018 13:42:32.177305221 UTC

L'horodatage ainsi modifié, il devient donc difficile de traquer le client à partir du transmit timestamp

The background is a blue gradient with white circuit-like lines in the corners. The lines consist of straight segments and small circles, resembling a printed circuit board layout. They are positioned in the top-left, top-right, bottom-left, and bottom-right corners.

**MERCI POUR VOTRE ATTENTION**
